To whom it may concern,

My name is Mike Cieszko and I am writing in regards to the co-op position available. I heard about this opportunity via Professor David Hess at Rensselaer Polytechnic Institute who suggested I would be a solid candidate. I am interested in a hands-on position in which I can contribute my ideas to the Hasbro team. Having been around Hasbro products my entire life, I can assure you that my interest in the company, designs, and team effort are genuine.

I am currently a junior dual majoring in Mechanical Engineering and Design, Innovation, and Society (otherwise known as Product Design and Innovation) at Rensselaer Polytechnic Institute. Throughout the last three years I have taken many courses and completed many projects that have prepared me for a position with Hasbro Inc. Examples include Product Design and Innovation Studio group projects, Engineering Design classes, and some more general technical design courses. Just as importantly I am a collegiate athlete and have played team sports my entire life. This has taught me the discipline of hard work as well as strengthened my prowess for group effort. Having been a newcomer to teams and groups many times before, I know what it takes to prove myself and thus my work ethic is unquestionable. As an engineer it is tough to find a position which places importance on team efforts. I believe that Hasbro would provide a place for me to expand my knowledge and experience of engineering, fabrication, innovation, and other important skills.

I would greatly appreciate if my resume were read and considered. If Howe Hasbro Inc. feels as though they would be interested, please contact me at (661)803-1092 or email at cieszm@rpi.edu. Thank you for your time and consideration and I look forward to hearing from Hasbro Inc. in the near future.

Sincerely,

Mike Cieszko
